

Real Skills. Real Projects. Real Future.

AI STEM Academy – Pilot Program

A hands-on AI learning experience preparing youth ages 16–21 for the future of technology, careers, and innovation.

About the Program

Kids N Tech AI bridges the AI literacy gap through hands-on, project-based learning. The AI STEM Academy Pilot introduces students to artificial intelligence through real tools, real projects, and real-world problem solving.

Who This Pilot Is For

- Youth ages 16–21
- Students ready to commit to a structured Saturday program
- Learners interested in AI, technology, creativity, and future careers
- Parent/guardian consent required for participants under 18

What Students Will Do

- Learn AI foundations and responsible use
- Practice prompt engineering and AI-assisted creation
- Build a real, portfolio-ready AI project
- Collaborate and present a final showcase project
- Earn a pilot completion certificate

Pilot Details

- Format: Hybrid (online + optional in-person)
- Platform: Google Classroom
- Start Date: Monday, February 9, 2026
- Live Sessions: Saturdays
- Program Length: 12 weeks
- Cost: FREE (Pilot Program – Limited Spots)

Program Expectations

- On-time attendance for all Saturday sessions
- Consistent participation and weekly assignment completion

- Respectful communication in Google Classroom
- Seats may be reassigned if participation requirements are not met
